

SURYA PRATAP SINGH

Flutter Developer | Android Developer (Kotlin) | iOS | 4+ Years Experience

suryapratapsinghdeveloper@gmail.com | +91 9627914349 | Noida, UP, India | [LinkedIn](#) | [GitHub](#)

SUMMARY

Flutter and Android Developer (Kotlin) with 4+ years of experience building and shipping cross-platform and native Android & iOS applications used by 10,000+ end users. Has achieved 99.5%+ crash-free sessions, cut API load times by 30%, and shortened release cycles by 20% through reusable component libraries. Expert in Bloc/Cubit, Provider, Jetpack Compose (Kotlin), MVVM, and Clean Architecture. Proficient in Firebase backend services and payment gateway integration (Razorpay, Stripe, PayPal). Works cross-functionally with design, backend, and product stakeholders — translating technical constraints into clear timelines and consistently delivering features on schedule.

TECHNICAL SKILLS

- **Languages:** Dart, Kotlin, SQL, Core Java, C
- **Frameworks:** Flutter 3.x (Android & iOS), Android SDK, Jetpack Compose, Jetpack Libraries (ViewModel, LiveData, Room, WorkManager, Navigation)
- **State Management:** Bloc/Cubit, Provider, Riverpod (Flutter) · ViewModel + StateFlow, LiveData (Kotlin/Android)
- **Backend & Database:** Firebase (Authentication, Firestore, Realtime DB, FCM, Crashlytics), REST APIs, SQLite, Room DB, Hive, SharedPreferences, DataStore
- **Payments:** Razorpay, Stripe, PayPal — end-to-end PCI-compliant checkout flows
- **Maps & Location:** Google Maps SDK, Places API, Geofencing, real-time location tracking
- **Architecture:** Clean Architecture, MVVM, MVC, Dependency Injection (Hilt/Dagger for Kotlin, GetIt for Flutter)
- **Tools:** Android Studio, VS Code, Xcode, Postman, Git, GitHub, Bitbucket
- **Deployment:** Google Play Store, Apple App Store, CI/CD pipelines, Provisioning Profiles, Signing Configurations
- **Other:** Platform Channels, Push Notifications (FCM), App Lifecycle Management, Coroutines & Flow (Kotlin), Debugging, UI Design

CORE COMPETENCIES

Communication | Cross-functional Collaboration | Problem-Solving | Analytical Thinking | Attention to Detail | Time Management | Adaptability | Critical Thinking | Mentorship | Leadership

WORK EXPERIENCE

Software Developer – Flutter & Android (Kotlin) | WebMobril Technologies Pvt. Ltd. Aug 2024 – Present

Noida, Uttar Pradesh, India

- Architected 3 production Flutter apps and 1 native Android (Kotlin + Jetpack Compose) app, cutting average feature delivery time by 20% by extracting a shared widget and utility library reused across all projects.
- Achieved 99.5%+ crash-free sessions by configuring Firebase Crashlytics alerting and resolving the top 15 fatal crash patterns within 2 weeks of each release.
- Reduced API load time by 30% (1.8s → 1.3s) by layering SQLite/Room DB and Hive offline caching with expiry-based invalidation on REST endpoints.
- Integrated Google Maps SDK with custom markers, geofencing, and live driver-location polling for real-time routing in an on-demand vehicle services app.
- Shipped Razorpay, Stripe, and PayPal checkout flows handling transactions for 10,000+ registered users with zero payment-related production incidents across 6 months.
- Raised unit-test coverage from 0% to 45% on core business logic using Bloc/Cubit (Flutter) and ViewModel + StateFlow (Kotlin), covering widget tests and unit tests across all new feature modules.
- Managed end-to-end Play Store and App Store releases — signing, provisioning profiles, phased rollouts, and store metadata — across 3 app titles.

Flutter & Android Developer | Ghoul Web Solutions

Noida, Uttar Pradesh, India

Jul 2022 – Aug 2024

- Delivered 5 Flutter apps and 2 native Android (Kotlin) apps from greenfield to production, averaging 11 weeks per app and consistently meeting all contractual deadlines.
- Reduced UI-related bug reports by 25% by establishing a pre-release component review checklist and auditing screens against Material Design 3 specs.
- Diagnosed and resolved 40+ production crashes through structured Crashlytics log analysis and root-cause debugging, raising average Play Store ratings from 3.8 to 4.4 stars.
- Migrated 2 legacy setState apps to Provider architecture and 1 AsyncTask-based Android app to Kotlin Coroutines + MVVM, eliminating recurring state-sync and threading bug categories.
- Reduced Firestore list-screen load times to under 1 second for 5,000+ record datasets using composite indexes, query limits, and cursor-based pagination.
- Mentored 2 junior developers via pair-programming and code reviews, accelerating their onboarding by ~3 weeks and improving overall code quality.

KEY PROJECTS

Employmint – Corporate HR and ERP System

Tech: Flutter · Firebase · REST APIs · Bloc/Cubit | [Play Store](#)

- Replaced a manual HR workflow with a mobile platform covering attendance tracking, leave approvals, payroll processing, and compliance reports — cutting admin processing time by 60%.
- Engineered a payroll module with automated salary calculations for variable pay structures and audit-ready CSV/PDF exports, eliminating a 2-day monthly finance reconciliation cycle.
- Enforced role-based access control (RBAC) using Firebase Auth custom claims, restricting sensitive payroll data to authorized roles only.

Garden Groceries – Online Grocery Delivery App

Tech: Flutter · Provider · Firebase · REST APIs | [Play Store](#)

- Built a grocery shopping app enabling users to browse products by category, manage carts, and place orders with real-time inventory and order status updates.
- Wired Firebase real-time sync for live cart and order updates, ensuring users always see accurate stock availability and delivery status without manual refresh.

Giftrr – Digital Gift Voucher Platform

Tech: Flutter · Firebase · Deep Linking | [Play Store](#)

- Reached 1,000+ downloads in 3 months; FCM push notifications achieved a 42% open rate, contributing to a 4.5-star Play Store rating.
- Added deep-link routing from shared gift URLs directly to specific voucher screens, increasing share-to-install conversion by an estimated 18%.

Garage X – Vehicle Service Booking Platform (User & Service Provider Apps)

Tech: Android (Kotlin) · Jetpack Compose · MVVM · Firebase · Google Maps SDK | [User App](#) | [Provider App](#)

- Built two native Android (Kotlin) apps — a Customer app for booking vehicle servicing/repairs and a Garage Provider app for managing job requests and repair status — sharing a common backend.
- Implemented real-time job matching using Firebase Firestore listeners with Google Maps SDK + Places API geolocation search, cutting average provider response time by ~35%.
- Built a live job-status pipeline (Pending → Accepted → In Service → Completed) with Jetpack Compose + ViewModel + StateFlow, synced instantly between both apps.
- Integrated Stripe for in-app service payments with auto-generated invoices, plus FCM push notifications to alert providers of new job requests within seconds.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science Engineering

Amani Group of Institutions, AKTU (Dr. A.P.J. Abdul Kalam Technical University), Lucknow | GPA: 7.6 / 10.0 | Graduated 2018
 Relevant Coursework: Database Management Systems, Machine Learning, Computer Networks, Cyber Security
